How Important is a website?

Very.

It's a nearly "free" means of interacting with the local business community. It is a platform to express the benefits you can provide to the public you serve. You can state your case for your ability to solve your client's problems. You can garner reviews from your clients as Google states often, "A satisfied customer is your best advocate." If you have a business, a website is recommended.

If you have more time than money, you can use a WIX website and get something up on the web for "free" minus your time, creativity and anxiety. "Does this look right?" "How come the picture looks stretched?" "Will my prospects find me online?" "If I build it, will they come..." Good question... it depends on how you do your backend, on page and off page SEO. (Search Engine Optimization)

Okay. Good. It may work and more power to you. After you experiment, call us. For those on a limited budget, we will build your website for you and make sure it's coded correctly, linked correctly, submitted to search engines correctly. Every page will provide proper SEO links and content to help get traffic of qualified prospects. We will install a dashboard control panel so you can add content and interesting articles that can help rank you higher in Google's algorithm. Or we can do these services for you as well.

Stop struggling and relax. There is a reason we are here and for the few dollars you budget, you will reap better rewards. To save everyone's time, figure out what you can budget toward marketing and business building.
